4706 Beloit Road,
West Allis, Wis.

Dear 9-AFZ:

Yours of the 16th received only two days ago. I am glad to hear you got the 1900 transmitter O.K. The parts of the spark gap were sent to me here and I am now sending them to you. If you cannot figure out how to assemble them, ask Mr. Charles F. Bortier of Johnson Service Company. It would be a fine thing to have him address the club on the early days of radio, when there were no amateurs, regulations, wave lengths or other stations. If that old 12" spark coil we used to have were turned loose now, I expect all radio in the U.S.A. would have to shut down.

73's & Happy New Year,

Paul F Johnson
